

VIET TRAN

SOFTWARE ENGINEER

Helsinki, Finland | vttranviet@gmail.com
www.linkedin.com/in/viettran-826399262 | <https://github.com/Viettranni>

Detail-oriented and motivated Software Engineer with a solid foundation in programming and web development. Experienced in B2B marketing and sales support, offering a unique blend of technical problem-solving and strong communication skills. Proven ability to thrive in collaborative environments and deliver practical, client-focused solutions.

AREA OF EXPERTISE

MERN-stack (MongoDB Atlas, Express, React, Node.js), Javascript, Python, SQL, Java, Flask, React Native

KEY ACHIEVEMENTS

- **JobScout – Fullstack Web Application & Mobile Version**
 - Collaborated on backend development for a job post aggregation app using web scraping.
 - Integrated GPT-3.5-Turbo API for automated cover letter generation, enhancing job application efficiency.
 - Implemented secure authentication and session management processes.
 - Used SCRUM methodology to drive timely project milestones and improve team collaboration.
- **Car Offer - Car Dealership Application**
 - Developed a full-stack app to automate car sales data collection and communication between customers and business partners.
 - Designed a form system for customers to submit car details and images, verifying and sending them to partners.
 - Integrated MongoDB for data storage and Firebase Storage for image handling.
 - Led the development of the admin interface for managing submissions and ensuring data integrity.
